2. INTRODUCTION

2.1 Purpose

The Regional District is seeking a qualified Contractor to provide services for the Regional District's Pender Harbour Food Waste and Organics Program to providing containers, hauling and off-site processing of Food Waste and Organics.

3. SITUATION/OVERVIEW

3.1 Background

In 2011 the Regional District adopted and incorporated diversion targets in our [Solid Waste Management Plan](#). The Solid Waste Management Plan was then supplemented in 2018 by adopting the [Regional Organics Diversion Strategy](#); this strategy has a goal to develop a road map that is financially sustainable and that will lead to a robust, region-wide organics diversion program. Further to this, in 2022 the Regional District banned the disposal of Food Waste and Organics, food soiled paper, and paper from the landfill for all sources.

Historically and currently, there is no curb side collection services available for Area A Pender Harbour - Egmont. And the Regional District needed to provide a Food Waste and Organics program for the residents in Area A, so the Regional District launched a drop-off pilot program at the Pender Harbour Transfer Station (PHTS). The current service model where the Residents come to site and drop off their Food Waste and Organics a large onsite 20-yard drop off container. The pilot project is nearing completion, and the Regional Districts needs to incorporate cost reduction measures into the program to improve the viability of the services in this Area.

3.1.1 Tonnage Estimate

During the term of the pilot program the Regional District completed an analysis of the tonnage coupled with the current service model. The analysis revealed that the current service model is financially unsustainable.

We received approximately half the expected amount of Food Waste and Organics during the term of the pilot project. To improve the financial viability it would require increasing tipping fees to make it a full cost recovery program, but the Regional District has determined that the current service model coupled with increased tipping fees would still be cost prohibitive. The Regional District annually received approximately 50 tonnes per year, and we originally anticipated that we would see 100 tonnes per year.

For those reasons, the Regional District has decided that they would like to expand the Food Waste and Organics drop-off to include small businesses in Area A and expect to receive between 50 – 80 tonnes per year.

3.1.2 Service Model and Seasonality

The current service model allows for some flexibility in servicing to meet the seasonal demand during the:

- Winter season (November through March) an average of 1.5 tonnes to 3.0 tonnes per are received.
- Remainder of the year, an average of 4.5 tonnes to 6.3 tonnes in a month are received.

3.2 Project Objectives

The main objective of the Pender Harbour Food Waste and Organics Drop-Off Program is to maintain a user-friendly Food Waste and Organics drop-off and processing service for Electoral Area A Residents and small businesses. This program will be open to all Residents and small businesses with individual self-haul loads that are manually hand loaded into a collection container. The project should include appropriately sized collection containers and seasonal considerations (3.1.2) and for the expected tonnages (3.1.1). The secondary objective is to improve the financial viability of the service. The Regional District encourages Proponents to consider a variety of solutions to assist with this objective while taking into consideration the scope (3.3) of the project.
