

# SUNSHINE COAST REGIONAL DISTRICT

Question and Answers # 1

Project no 2621001

Title: Type 3 Structure Protection Trailer and Equipment

**Date: 22/05/2026**

## **Item No.1**

**Question:** If available, please provide the brand of trailer on which the structural protection unit requirements are based.

**Answer:** The trailer requirements outlined in the specification were not developed based on any specific brand or manufacturer. The specifications were written to define the functional and structural performance requirements necessary to meet operational needs and are intentionally vendor-neutral to allow for open and competitive procurement.

Proponents are encouraged to work with their trailer suppliers or manufacturers to propose a solution that meets or exceeds the stated specifications, whether through a standard product, a modified unit, or a purpose-built trailer.
