

SUNSHINE COAST REGIONAL DISTRICT

Question and Answers #2

Request for Proposal No. 2465007

Engineering Services for Vinebrook Bridge

Date: August 1, 2024

Item No.1

Question: Was there a hydrological assessment previously performed at the creek?

Answer: No, a hydrological assessment has not previously been performed at the creek.

Item No.2

Question: Was there a geotechnical assessment previously performed at the creek?

Answer: No, a geotechnical assessment has not previously been performed at the creek.

Item No.3

Question: To what standard does the SCRD expect the design to be?

Answer: The bridge needs to be able to meet the existing service level for the trail, supporting pedestrian, horse, and ATV crossing. The design needs to meet provincial standards for recreational trail bridges.

Item No.4

Question: Are there any as-built drawings by any chance?

Answer: There are no as-built drawings available for the existing structure, except for the cross section included in Appendix C.

Item No.5

Question: As this project appears to only be conceptual design, tendering support and construction administration, can you please clarify if the preliminary and detailed design are considered additional work? Since the RFP does not clearly indicate the requirements for the preliminary and detailed design? Do these fall within the published budget or are also considered additional?

Answer: The preliminary and detailed design are included in the published budget (\$45,000). The design needs to include dimensions, materials, etc, and it will need to be submitted with a Class B estimate. Tendering Support (section 3.5) and Construction Administration (section 3.6) are considered additional work and are subject to available budget for the construction portion of the replacement.
