Question and Answers #1

Request for Proposal No. 2334502-1

Engineering Services Hopkins Landing Capital Upgrade

Date: November 21, 2023

Item No.1

In section 3.1, it states that: *Proponents are asked to submit no more than 3 design options for the construction of the facility, each design option will be evaluated as a separate proposal.* What level of design detail is expected in the proposal? Does the submission require drawings?

Answer

The Proponent is to submit a level of design detail that would convey the main information the Proponent is trying to feature within their design. This may include but is not limited to key features, general layout, pros and cons, environmental impacts, cost considerations, etc. The drawing submitted is what the proponent deems necessary to convey this information. To include a drawing or sketch of their proposed design/repairs of the facility is the decision of the Proponent.
